Daniela Carter is this week’s student of the week. She joined the academy in the spring of 2011. She is a member of the Chemistry research cluster working with Dr. Hambourger and she is currently seeking a degree in Chemistry.

Daniela is from Clemmons, NC and she graduated from West Forsyth High School in 2009. Her favorite subject is Genetics and she enjoys walking dogs at the Human Society, reading, and playing with children.

Daniela’s favorite memory from the academy thus far was going to Hardin Park Elementary School and performing science experiments for the children and spending time with them. When asked to provide a quote about her experience in the academy, she provided one from Lord Chesterfield: “If we do not plant knowledge when young, it will give us no shade when we are old.” Upon graduating, Daniela plans on going into the Peace Corps.

WEEK OF 9/25/11 – 10/1/11
