Tyler Taylor

WoWForDummies

Unable to keep up with the rest of the players on your server?

The Boost you need is here!

WoWForDummies is a User-based interactive addon extension that allows the user, with the click of a button, to import a spell rotation guide. Once the user has the extension loaded in-game, the extension will guide the user on the rotation to use during combat. Icons are displayed and sounds can be heard to alert the user on what to do next. All of this happens in real-time during combat. Are you parsing blue and green on raid bosses? With the help of this add-on extension you can jump to the top of the damage meters and get your 99's guaranteed!
