

Tentative Calendar for Fall 2021 WRC 1010

Some items have strict deadlines, including debriefs, exams, and the final project components. Many labs are mostly completed during the Monday class—typically, you should submit a PDF for completion credit by Tuesday in the ASULearn assignment but if you weren't able to succeed, you can typically resubmit by Thursday at the latest. Practice quizzes are repeatable until the listed deadline. However, if you weren't able to succeed by that deadline then a second chance will appear for you and stay open until closer to the relevant exam, but the checkmark is easier to obtain when it is originally due (70% instead of 90%). All other activities are those you should attempt for completion by the listed due date—some may have strict deadlines while others are open until closer to the corresponding exam.
