

Recording Possibilities

- Zoom — great for recording with a partner but can be really slow during finals if you are saving on their server. Can save a copy locally and then upload to YouTube and make it unlisted or public to share. Google Drive with permissions set to “anyone at appstate” works too.
- ScreenPal
- Kaltura Capture Install
Kaltura Student Forum Post

The screenshot shows a Zoom window titled "periodic payment intro". The main content area displays a math problem and its solution:

periodic payment
\$100 every month for 25 years, compounded monthly at 5%?
total savings + interest

$$\frac{100((1 + \frac{0.05}{12})^{300} - 1)}{\frac{0.05}{12}}$$
$$\frac{100((1 + \frac{0.05}{12})^{300} - 1)}{(\frac{0.05}{12})}$$

A red arrow points from the top of the second equation to the bottom of the first equation. In the bottom right corner, there is a small video thumbnail of a person and a "YouTube" logo.

Grading and Where to Get Help

- I have scheduled grading of your final projects and any “(optional) exam corrections” during the faculty grading period after finals are over but before grades are due.
- Office hours during our assigned time—both on Zoom and in person in our classroom if weather allows—if I can help with anything or you want a place to work or just to say bye!
- I will post feedback comments about your final project on your Google Grades Sheet
- Official course evaluations remain open!
