Course Average

$$\frac{.10 \times \textit{Participation} + .25 \times \textit{Projects} + .5 \times \textit{Exams}}{85} \times 100$$

The grading scale is: A $\geq$ 93; 90 $\leq$ A- < 93; 87 $\leq$ B+ < 90...

- Choose 2 of 3 Projects (25%). If you have completed both projects and are happy with your grade, then you don't need to complete Project 3. However you may want to, to help your average.
- Everyone tries Exam 3 for general education assessment. I do drop the lowest test.
- Video assignment counts as part of the participation grade.
- The final research presentations are worth 15% of the course grade and mandatory to pass the course.

happy to help

I care about you and your success!
