

- Stand up and share your preferred name(s) and majors and minors. If working with a partner, stand up together.
- Briefly, share your idea for the final project. If you are unsure, you can present more than one idea and decide later.
- Share something you might do over break.

extension of course content	material presented orally extends class content in some creative way by explaining new material, examining connections to your interests, describing historical connections, or other new connections
alphabetized bullet point list of related class topics near the beginning of your presentation	orally and in writing presents an alphabetized bullet point list of topics we covered that relate to your topic—at least one topic from our class is on it. The list is near the beginning of your presentation
depth of linear algebra connections	rich linear algebra connections, presented orally with correct mathematics and connecting to the language of our class when possible and aimed at a peer who needs a refresher. depth can be achieved by reviewing related linear algebra we already covered and connecting it to your extension, if the extension is a program you create, history, real-life applications, etc., or it can be achieved with the linear algebra extensions themselves, if the topic is one we haven't covered.
if applicable, professional scholarly reference list with author names at end of slides	if applicable, cites credible, relevant sources and/or evidence that are situated within the context and purpose of the presentation and are listed professionally and cited appropriately, including authors
if applicable, cites image references	images are referenced by their original source but do not need authors. Place these and any other citations at the end of your slides
overall writing and speaking	contains writing and speaking that is clear, well organized, and professionally presented (it is ok to have some imperfect flow in your speech)
own words/self-creation	products that you create yourself in your own words
share final project ideas during class	on our last day together before finals, you will briefly present your name and final project plans. If you are unsure, you can present more than one idea and decide later.
forum post	post a message in the final project forum containing your preferred name(s), the final project title, and a link to your video that we can access unless you work with a partner in which case one of you posts that and the other posts a message naming your partner
4 peer reviews	in-depth peer review of 4 classmates' presentations with topics different than yours (if possible) and detailing strengths, suggestions and what you learned (see below for questions)
self-reflection	in-depth self-reflection (see below for questions)
