

Breakthroughs and Controversy in Science and Mathematics

- Interdisciplinary Modes (or Academic Disciplines and Perspectives) of Inquiry
- Connections to Faculty, Students, Courses, and the University
- Freshman-Level Research Activities
- I. A. Recognize, differentiate, and effectively employ appropriate and increasingly sophisticated strategies to collect and interpret information;
- I. C. Examine and evaluate how their own personal, historical, and cultural perspectives affect the discovery and generation of knowledge;
- II. A. Articulate and comprehend effectively, using verbal or non-verbal communication suitable to topic, purpose, and audience;
- II. B. Use writing effectively to discover and develop ideas and to articulate positions in contexts of increasingly complexity;
- IV. C. Collaborate effectively with others in a shared process of inquiry and problem-solving.
