

Evelyn Boyd Granville

Pioneering Mathematician

Evelyn Boyd Granville in 2001

Evelyn Boyd Granville in 1997

I can say without a doubt that this [NASA] was the most interesting job of my lifetime - to be a member of a group responsible for writing computer programs to track the paths of vehicles in space.

The quotation is from Granville, E.B. (1989). My Life as a Mathematician. *SAGE: A Scholarly Journal on Black Women* 6(2), 44-46.

The 2001 picture was taken at Yale University when Granville received an honorary degree. The 1997 picture was taken by Margaret Murray.
