

Getting to Know a Scholar: 10/17-10/23/16

Sierra Milosh is from Morehead City, NC where she attended West Carteret High School and graduated in 2014. She is double majoring in Mathematics and Applied Physics, her favorite subject is Analytical Physics. She enjoys being active, listening to live music, cooking, having conversations with intelligent people. She decided to double major because she has always liked the way things work the way they do which made both physics and mathematics seem like the right choice. She chose ASU because it's easy to make new friends on a daily basis, the music scene in Boone is very good, and the professors are very approachable.
