

Scientific Consensus

- those who lack scientific expertise can't make informed decisions

[www.ncbi.nlm.nih.gov/pubmed/17928363]

- regulation stifles scientific innovation

**Science funded by
the government is
perverted and
politicized.**

Competitive Regulatory Agencies (CRA's)

CRA's are the base of all Haley2024 reforms.

Regulations and the bureaucracies that follow are vitally important services. The government's monopoly on these

Scientific Consensus

- Not unreasonably, many scientists believe that science should be left to its own devices in determining research priorities and conducting research.[www.ncbi.nlm.nih.gov/pubmed/17928363]
- A transparent institutional review process will balance scientific freedom and national security better than publication restrictions
[scholarship.law.georgetown.edu/cgi/viewcontent.cgi?article=1783]
- ethical and social values are relevant, especially in biomedical sciences, and we need diverse stakeholders, including scientists, community members, policymakers, and ethicists working together
[www.ncbi.nlm.nih.gov/pubmed/17928363]
- scientists support regulation of vaccines for the public good as an application of science
