

Names _____

1. First, each group member shares one idea from the readings on *Will the Search for Extraterrestrial Life Ever Succeed?* that you **disagreed** with an author on—explain the idea to your group members and explain what you think (and why).

2. Stuart Pugh (1929-1993), a professor of design at Strathclyde University in Glasgow, Scotland is known for creating the decision matrix method that is used to weigh (and help decide on) multi-dimensional options. Originally used in engineering, it is a popular method in diverse fields, including economics, mathematics and financial investment analysis.

As a group, create one Decision Matrix - with **one item** in each spot. Your items may contain information from the readings or ideas your group has.
